

OVER 21 YEARS OF PROTECTING UNDERWATER ASSETS™ DIY 200ml Kit

Model #RPS200

“IT JUST WORKS! Prospeed® is the original, and still the best running gear coating on the market. For the past 21 years boat yards around the world have been applying Prospeed® to vessels of all shapes and sizes, with various types of running gear. Prospeed® is the premier coating that protects the performance of underwater metal surfaces. You can trust Prospeed® to deliver exceptional results for your customers.”

THOUSANDS OF BOAT OWNERS AROUND THE WORLD HAVE REAPED THE BENEFITS OF PROPSPEED®:

- Reduces drag and fuel consumption, saving your customers money.
- Extends the life of sacrificial anodes.
- Protects all underwater metals from corrosion and stray currents.
- Lasts longer than standard antifouling and other look alike products.

Prospeed® is a must-have on any vessel that has underwater running gear. There are other running-gear antifouling systems out there, but none can compete with Prospeed®.

– Michael Yankowski, Yard Manager, Lauderdale Marine Center, Florida.
